Profile Summary:

Full Stack Software Engineer with 5.5 years of experience designing, developing, and deploying scalable web applications using .NET Core, ASP.NET Core, C#, SQL Server, Angular, React, Next.js, and Node.js. Skilled in building RESTful APIs, implementing database-driven solutions with Entity Framework Core, and developing responsive front-end applications. Experienced in CI/CD pipelines, containerization, cloud platforms, and production deployments. Strong understanding of software development lifecycle, Agile methodologies, DevOps practices, and application monitoring.

Actively seeking Software Engineer / Full Stack Developer opportunities to contribute to modern application development, cloud-native solutions, and high-quality software delivery.

Core Competencies:

Programming Languages: C#
Backend Technologies: .NET Core, ASP.NET Core, Entity Framework Core, REST APIs, Node.js
Frontend Technologies: Angular, React, Next.js
Database: SQL Server
Cloud & DevOps: Azure, Docker, Rancher, Jenkins, GitHub Actions, Splunk, CI/CD
Tools: Git, GitHub, Jira, Swagger, Splunk, Postman
Methodologies: Agile Scrum

Professional Experience:

HCL Tech – Software Engineer (Nov 2024 – Present) | Pune, India

Technology Stack:C#, .NET Core, ASP.NET Core, Angular, React, Node.js, SQL Server, Azure, Docker, Jenkins, CI/CD, GitHub, Jira, Swagger, Splunk, CyberArk, Snowflake

Project: Vendor Payment Application – Office Depot

- Supported and maintained enterprise applications which developed using.NET Core, ASP.NET Core, Angular, React, Next.js, and Node.js.
- Implemented new business requirements, feature enhancements, and bug fixes across frontend and backend applications.
- Designed and developed RESTful APIs and integrated them with web applications to support business workflows.
- Supported and maintained critical production applications, troubleshooting issues and ensuring system stability.
- Analysed vulnerability findings in Splunk, Snyk and GitHub security scans, and remediated reported issues to strengthen application security.
- Implemented CyberArk integration for secure credential management and Snowflake Key Pair Authentication for secure application connectivity.
- Supported and monitored ESP batch jobs, investigating job failures and resolving frontend/backend issues impacting business operations.
- Participated in application deployments, release activities, and CI/CD processes using Jenkins, Docker, and version control through GitHub.
- Used Splunk to review application logs, investigate security reports and support vulnerability remediation and root-cause analysis.
- Collaborated with cross-functional teams in an Agile/Scrum environment, managing work items and defects through Jira.

CompuCom – Software Engineer (Oct 2022 –Nov 2024) | Pune, India

Technology Stack:React, Node.js, SQL, REST APIs, Jira, Git, Agile Scrum

Project: Vendor Payment Application – Office Depot

- Developed and maintained a finance application module used to manage vendor invoice stop-payment requests and payment validation processes.

- Designed and implemented responsive user interfaces using React for request creation, request tracking, reporting, and access management functionalities.
- Developed and enhanced backend services and REST APIs using Node.js to support business workflows and data processing.
- Worked extensively with SQL for database design, query optimization, and data management.
- Participated in the modernization of legacy application components by migrating functionality from ASP-based applications to React.
- Performed system testing, validation, and defect resolution to ensure application reliability and performance.
- Collaborated with cross-functional teams to analyse requirements, troubleshoot issues, and deliver new features.
- Tracked project activities, defects, and sprint progress using Jira, while providing regular status updates to stakeholders.

Capgemini – Software Engineer (Apr 2021 – Sept 2022) | Pune, India

Technology Stack:.NET Core, C#, Angular, Entity Framework Core, SQL Server, REST APIs, WSO2 Identity Server (SSO), Git, Agile Scrum

Project: Employee Onboarding & Information Portal

- Developed and maintained REST APIs using .NET Core and C# to retrieve and manage employee-related information.
- Built and enhanced responsive user interfaces using Angular to improve the employee onboarding experience.
- Designed and implemented data access layers using Entity Framework Core with both Code-First and Database-First approaches.
- Developed and optimized database queries, stored procedures, and data models using SQL Server.
- Integrated WSO2 Identity Server for Single Sign-On (SSO), authentication, and authorization.
- Collaborated with cross-functional teams to analyse requirements, develop features, and resolve production issues.
- Participated in code reviews, testing, debugging, and deployment activities throughout the development lifecycle.
- Followed Agile development practices and contributed to the successful delivery of project milestones.

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Developer Associate(AZ-204)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Microsoft Certified: AI Fundamentals (AI-900)
- Agile Software Development – Coursera

Education

- Bachelor of Engineering (Electrical) – MMCOE, Pune(OCT 2017 –

OCT 2020)

- Diploma in Electrical Engineering – Smt. S.S. Patil Institute of Technology, Chopda (AUG 2014 – SEPT 2017)
